STREAM BUFFER VARIANCE APPLICATION PACKET

This package contains all the forms and instructions necessary to apply for a stream buffer variance from the City of Chamblee’s Unified Development Ordinance (UDO).

1. Stream Buffer Variance Applicant Checklist
2. Stream Buffer Variance Application
3. Owner Permission Affidavit
4. Disclosure of Campaign Contributions & Gifts

See Section 310-19 of the UDO for a full description of all requirements for filling a stream buffer variance application. As required also attach the following to your application:

1. A pre-application form signed and dated by the Development Director stating that a pre-application meeting took place pursuant to section 120-10.
2. A legal description of the tract(s) that are the subject of the application.
3. An application fee established by the City.
4. Other materials reasonably required by the city necessary to the analysis of the application.

As stated in Section 280-5(b)(1).

“No application shall be deemed accepted and filed until all required forms have been completed and all required materials have been submitted, including fees. The date an application is complete and hence accepted and filed shall be noted on the application form by the city manager or his/her designee, and any subsequent deadlines tied to date of application shall begin to run as of said date; and

Applicant will be notified by city manager or his/her designee as to the next available regularly scheduled mayor and city council hearing at which said application may be heard.”

Please review the attached forms and contact the Development Department to schedule an appointment to begin the process.
Stream Buffer Variance Application Submittal Checklist

This list represents the minimum requirements to be submitted for review of a Stream Buffer Variance Application.

1. GENERAL INFORMATION
   a. Pre-Application form signed and dated by Development Department Staff
   b. Application form
   c. Application fee paid
   d. Legal Description (including Parcel Identification and Address) for each property involved.
   e. Property Owner Authorization form (if applicant is not owner)
   f. Campaign Disclosure Form
   g. Responses to review criteria
   h. Proposed mitigation for stream buffer intrusion, if required

2. EXISTING SITE CONDITIONS: PLAT OR SITE PLAN
   Must be to-scale and at a minimum indicate:
   a. Parcel boundary
   b. Existing building footprints, drives, and parking areas
   c. Location of streams, wetlands, floodplain boundaries, other natural features, determined by field survey

   Additional information relevant to the variance request may also include:
   a. Topographic map at a minimum 1”=100’ scale, including information on:
   b. Man-made and natural features
   c. Utilities
   d. Streams and stream buffers (City and State)
   e. Easements and right-of-way
   f. Features to be retained, moved, or altered
   g. Shape and dimensions of the existing lot to be built upon
   h. Location of existing trees and/or landscape
   i. Threshold Elevation of existing structures

3. PROPOSED SITE IMPROVEMENTS
   A site plan at a minimum 1”=100’ scale, including information relevant to the variance request such as:
   a. Building footprints
   b. Limits of land disturbance, both inside and outside the stream buffer areas
   c. Impervious cover, both inside and outside the stream buffer areas
   d. Exact length and area (sq. ft.) of buffer being impacted by land disturbance and impervious surface
   e. Open Space and proposed landscaping
   f. Yards and Setbacks
   g. Parking and drives
   h. Sidewalks and streetscape
   i. Stormwater management plan and structures proposed
   j. Retaining walls
   k. At least one alternative plan that does not require intrusion into the stream buffer, or explanation of why such a site plan is not possible.

NOTE: Variances will only be considered after a public hearing and findings that the subject property's shape, topography or other physical conditions that were existing prior to July 18, 2006 prevent land development unless a buffer variance is granted or in unusual circumstances when strict adherence to the minimum buffer requirements would create an extreme hardship. The burden of proof of these circumstances lies with the applicant.
STREAM BUFFER VARIANCE APPLICATION

This page must be completed by the Applicant.

APPLICANT

☐ If the applicant is not the owner, submit a signed/notarized Owner Permission Affidavit form.
WRITTEN ANALYSIS FOR A STREAM BUFFER APPLICATION

The Mayor and City Council shall authorize variances to the City of Chamblee Stream Buffer standards found in Chapter 310, Article 2 of the UDO only upon consideration of the following factors. Please provide an explanation below for each factor as it applies to your property. Attach additional pages as needed.

1. The shape, size, topography, slope, soils, vegetation, and other physical characteristics of the property;
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________

2. The locations of all streams on the property, including along property boundaries;
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________

3. The location and extent of the proposed buffer or setback intrusion;
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________

4. Whether alternative designs are possible which require less intrusion or no intrusion;
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________
   ___________________________________________________________________________________
5. The long-term and construction water-quality impacts of the proposed variance; and

___________________________________________________________________________________

___________________________________________________________________________________

___________________________________________________________________________________

___________________________________________________________________________________

___________________________________________________________________________________

6. Whether issuance of the variance is at least as protective of natural resources and the environment.
